**TEAM ID: NM2023TMID18328** 

### 1.INRODUCTION:

### 1.1 Overview:

Event management is the process of creating and maintain an event. This process spans from the very beginning of planning all the way to post event strategizing.

### 1.2 Purpose:

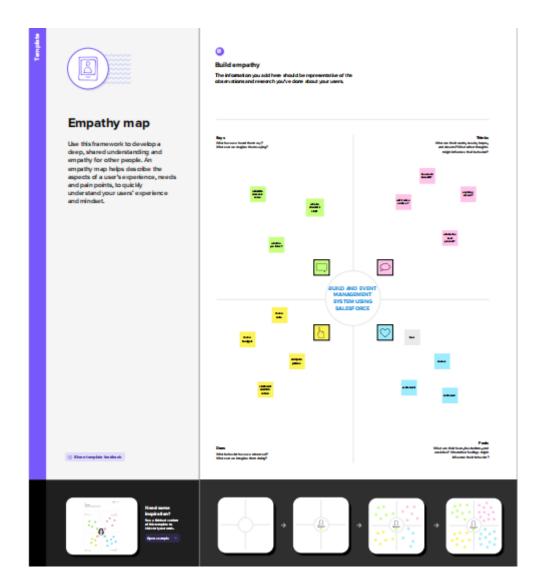

At the start, an event manager makes planning decision, such as the time, location, and theme of their event. During an event, event managers observes the events live and make sure things run smoothly. after an event, event managers are tasked with reviewing event data, submitting KPI and ROI findings, and staying on the ball for any post-event offerings.

# 2. Problem Definition & Design Thinking

# 2.1 Empathy map:

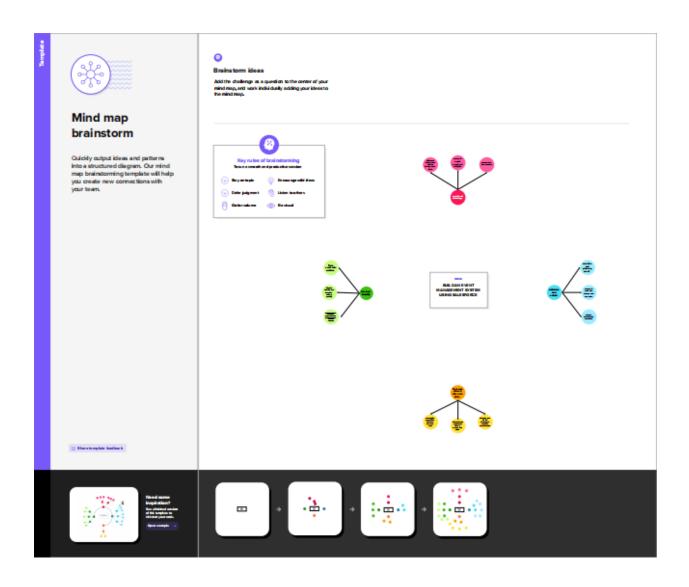

An empathy map is a collaborative visualization used to articulate what we know about a particular type of user. It externalizes knowledge about users in order to

- 1) create a shared understanding of user needs, and
- 2) aid in decision making

# 2.2 Brainstorming:

Brainstorming is a group problem-solving method that involves the spontaneous contribution of creative ideas and solutions. This technique requires intensive, freewheeling discussion in which every member of the group is encouraged to think aloud and suggest as many ideas as possible based on their diverse knowledge.
